SELECTION OF PROJECTS

AI-POWERED LICENSE DETECTOR | PYTHON, FLASK, DOCKER

2025

- Developed an automated tool to detect and analyze software licenses and Terms of Use (ToS) across web pages, ensuring compliance with robots.txt standards.
- Integrated Large Language Models (Google Gemini & Hugging Face Mistral) to summarize complex legal text and provide a Q&A interface for users.
- Engineered a modular architecture using Python, featuring a ModelManager for switching between AI providers and a LicenseDetector for scraping and parsing HTML content.
- Deployed the application using Docker and Docker Compose, creating a portable web-based prototype accessible via a local server.

EMPLOYEE RECORDS MANAGEMENT SYSTEM | PHP, SYMFONY, SQLITE, DOCKER

2024

- Architected a full-stack web application using Symfony and Doctrine ORM to manage employee data including pagination and filtering.
- Designed and implemented a RESTful API providing external access to data with full CRUD capabilities.
- Developed a responsive frontend using Twig templates, CSS, and JavaScript, featuring dynamic search and data management interfaces.
- Containerized the development environment using Docker Compose

C++ SPREADSHEET ENGINE | C++, CMAKE

2024

- Developed a high-performance expression evaluator capable of parsing and calculating complex mathematical formulas (arithmetic, logic, and cell dependencies).
- Designed an Object-Oriented architecture utilizing abstract base classes and polymorphism (CExprBuilder) to extend functionality for custom operators and data types.

CERTIFICATIONS

DATABASE PROGRAMMING WITH SQL ORACLE ACADEMY

2023

- Certification covered relational database fundamentals, SQL query writing, data modeling, and database management using industry-standard practices from Oracle Academy.

DATABASE DESIGN ORACLE ACADEMY

2023

- Certification focused on database design principles, including data modeling, entity-relationship diagrams (ERDs), normalization, and translating business requirements into efficient relational database structures, delivered by Oracle Academy.

SKILLS

PROGRAMMING

Experienced:

Python • C++ • SQL • HTML • CSS • JavaScript

Familiar:

PHP • L^AT_EX • Bash

LIBRARIES/Frameworks

Symfony • Flask • Node.js

TOOLS/PLATFORMS

GitLab • GitHub • Docker • CMake

EDUCATION

CZECH TECHNICAL UNIVERSITY

BACHELOR'S IN COMPUTER SCIENCE

2022 - 2025 | Prague, Czech Republic

Faculty of Information Technology

CZECH TECHNICAL UNIVERSITY

MASTER'S IN COMPUTER SCIENCE

2025 - Present | Prague, Czech Republic

Faculty of Information Technology
